Miro King Bed

1. Position two halves of bed frame upside down and adjacent to each other on a carpet or surface protected with a blanket or other soft material. Attach frame parts with binding posts, as shown, then alternate tightening gradually with 4mm Allen wrench.

2. Attach either leg assembly to bed frame with six long M6 bolts, as shown, threading all loosely but waiting to tighten fully until next step. Repeat with other leg assembly.

Miro King Bed

3. Attach legs of one leg assembly to corner blocks with two long M8 bolts in each leg, as shown, then tighten fully with 5mm Allen wrench. Now return to loosely threaded bolts in previous step and tighten fully with 4mm Allen wrench. Repeat with other leg assembly.

4. Attach either center leg to frame using four short M6 bolts, threading all loosely at first then returning to tighten fully with 4mm Allen wrench. Repeat with other leg. Install base plate on either end of bed with 12 short M6 bolts, threading all loosely at first then returning to tighten fully with 4mm Allen wrench. Repeat with other plate.

Miro King Bed

5. Lift and turn bed frame over, making sure to put no pressure on legs. Position near final location with holes at head of bed.

6. Attach headboard to frame using flat washer and short M8 bolt, as shown. Tighten bolts evenly with 5mm Allen wrench.
